In mathematics, a fractal is a subset of a Euclidean space for which the Hausdorff dimension strictly exceeds the topological dimension. Fractals are encountered ubiquitously in nature due to their tendency to appear nearly the same at different levels, as is illustrated here in the successively small magnifications of the Mandelbrot set. Fractals exhibit similar patterns at increasingly small ...

Geometry (from the Ancient Greek: $\gamma\epsilon\omicron\mu\epsilon\tau\epsilon\rho\acute{\alpha}$; geo-"earth", -metron "measurement") is a branch of mathematics concerned with questions of shape, size, relative position of figures, and the properties of space. A mathematician who works in the field of geometry is called a geometer.. Geometry arose independently in a number of early cultures as a practical way for dealing with lengths ...

Michael Schneider in Conversation A Coffee, Culture, Cake event. Galileo pointed out that the Book of Nature is written in an alphabet of simple geometric shapes like circles, triangles, squares and spirals. Michael contends that if we recognise and understand the principles expressed by these shapes, we can know what nature is doing in any situation.

Warsaw, Poland August 20 - August 30, 2018. The topic of the forthcoming school: Nonlinear PDEs, their geometry, and applications. The goal of the forthcoming school is to present recent results in the theory of nonlinear PDEs, their geometry, and applications. The courses will stress a role of geometrical methods and especially methods of contact geometry to study nonlinear PDEs and methods ...

Resize the image using data-dependent triangulation. See Image Geometry for complete details about the geometry argument. The -adaptive-resize option defaults to data-dependent triangulation. Use the -filter to choose a different resampling algorithm. Offsets, if present in the geometry string, are ignored, and the -gravity option has no effect.
