Exploration geophysics is an applied branch of geophysics, which uses physical methods, such as seismic, gravitational, magnetic, electrical and electromagnetic at the surface of the Earth to measure the physical properties of the subsurface, along with the anomalies in those properties. It is most often used to detect or infer the presence and position of economically useful geological ...

Geoprosessions is a term coined by the Geoprosessional Business Association to connote various technical disciplines that involve engineering, earth and environmental services applied to below-ground (subsurface), ground-surface, and ground-surface-connected conditions, structures, or formations. The principal disciplines include, as major categories:
