ActionBioscience.org examines bioscience issues in biodiversity, environment, genomics, biotechnology, evolution, new frontiers in the sciences, and education. Includes peer-reviewed articles, class lessons, and educator resources

### **ActionBioscience - promoting bioscience literacy**

We have updated the Lizard Evolution Virtual Lab based on feedback from field testers (over 50 classrooms!). The virtual lab includes four modules that investigate different concepts in evolutionary biology, including adaptation, convergent evolution, phylogenetic analysis, reproductive isolation, and speciation.

Marginocephalia are named for a shelf that projects over the back of the skull. They include the pachycephalosaurians and ceratopsians.. Pachycephalosaurs are best known for their thick upper fronts to their skull. The oldest known is Stenopelix, from the early Cretaceous of Europe.. Ceratopsians, famous for Protoceratops, Triceratops and Styracosaurus illustrate the evolution of frilled and ...

The level of support for evolution among scientists, the public and other groups is a topic that frequently arises in the creation-evolution controversy and touches on educational, religious, philosophical, scientific and political issues. The subject is especially contentious in countries where significant levels of non-acceptance of evolution by general society exist although evolution is ...

Business Engagement At OECD. In the framework of promoting resilient economies and economic prosperity, the OECD views the digital economy as a key aspect of the overall agenda for social development and economic growth.

### **Digital Economy**

The role of missing links is most difficult to understand. Surely, argue the creationists and other religious fundamentalists, if evolutionists claim that all of life is related through a single huge family tree extending from the present day back millions of years to a single point of origin, we should find fossils that are midway between established groups.

This film explores the genetics and evolution of lactase persistence in humans. Babies can easily digest milk, the food especially provided for them by their mothers. Later in life, most of us lose this ability because we stop producing lactase, the enzyme that helps us digest the sugar in milk. But ...
