Educational psychologists and pedagogues have identified several principles of learning, also referred to as laws of learning, which seem generally applicable to the learning process. These principles have been discovered, tested, and used in practical situations. They provide additional insight into what makes people learn most effectively.

If you want to be sure your pediatrician has your child's best interest, this is mandatory reading. Pediatricians around the country have begun refusing to accept families who opt out of some or all vaccines. Thanks to a tip sent to Wellness & Equality by a reader, now we know why. When my friend's child suffered a life-threatening reaction to a vaccine a week after her first birthday, myâ€¦

The Catalyst 4500 series switches, which includes the Catalyst 4948 switches, has a sophisticated packet-handling methodology for CPU-bound traffic. A commonly perceived problem is high CPU utilization on these switches. This document provides details about the CPU packet-handling architecture and shows you how to identify the causes of high CPU utilization on these switches.

A strokeâ€”also called a cerebrovascular accident (CVA) or a brain attackâ€”is a reduction or an interruption of the flow of blood through an artery to one or more areas of the brain within the territory supplied by that artery. The end result is varying degrees of neurological and/or cognitive malfunction lasting longer than 24 hours. A very severe stroke can cause sudden death.
