Observing the fact that sustainability is interdisciplinary is only the beginning. Sustainability has deep roots in both the physical and social sciences. Understanding the effect and interaction of different activities with the natural environment and its implication on current and future quality of life is based on advances in a variety of different areas of the natural sciences.

Diabetes is a chronic disease that requires a person with diabetes to make a multitude of daily self-management decisions and to perform complex care activities. Diabetes self-management education and support (DSME/S) provides the foundation to help people with diabetes to navigate these decisions and activities and has been shown to improve health outcomes (17).
