Determination of surface energy. Measuring the surface energy of a solid. The surface energy of a liquid may be measured by stretching a liquid membrane (which increases the surface area and hence the surface energy). In that case, in order to increase the surface area of a mass of liquid by an amount, $\hat{1}'A$, a quantity of work, $\hat{1}^3\hat{1}'A$, is needed (where $\hat{1}^3$ is the surface energy density of the ...

Post-translational modification (PTM) refers to the covalent and generally enzymatic modification of proteins following protein biosynthesis. Proteins are synthesized by ribosomes translating mRNA into polypeptide chains, which may then undergo PTM to form the mature protein product. PTMs are important components in cell signaling, as for example when prohormones are converted to hormones.
