The AVS Pacific Rim Symposium on Surfaces, Coatings and Interfaces (PacSurf 2018) will be held on the Big Island of Hawaii from December 2 – 6, 2018. This conference is being organized by AVS (United States) with a Steering Committee composed of representatives from Australia, Canada, China, Japan, Korea, Mexico, New Zealand, Philippines, Singapore, Taiwan, and the United States.

Colloids and Surfaces B: Biointerfaces is an international journal devoted to fundamental and applied research on colloid and interfacial phenomena in relation to systems of biological origin, having particular relevance to the medical, pharmaceutical, biotechnological, food and cosmetic fields. Submissions that: (1) deal solely with biological phenomena and do not describe the physico ...

For materials science, metal/oxide interfaces can be found in many technological materials, such as functional ceramics with metals, oxide dispersion-strengthened alloys, oxide coatings on metals functioning as thermal barriers or natural corrosion protection layers, etc. Fundamental problems with these systems include the adhesion strength, mechanical stability, and fracture behavior of the ...

A surface, as the term is most generally used, is the outermost or uppermost layer of a physical object or space. It is the portion or region of the object that can first be perceived by an observer using the senses of sight and touch, and is the portion with which other materials first interact.

### **Surface - Wikipedia**

The attack surface of a software environment is the sum of the different points (the "attack vectors") where an unauthorized user (the "attacker") can try to enter data to or extract data from an environment. Keeping the attack surface as small as possible is a basic security measure.
