Environmental Progress & Sustainable Energy is a publication of the American Institute of Chemical Engineers reporting on critical issues of the environment, including remediation and treatment of solid or aqueous wastes, air pollution, sustainability, and sustainable energy. Published six times a year, each issue helps engineers and scientists stay on top of technological advances in all ...

### **Environmental Progress & Sustainable Energy - Wiley Online**

Sustainable energy is energy that is consumed at insignificant rates compared to its supply and with manageable collateral effects, especially environmental effects. Another common definition stainable energy is an energy system that serves the needs of the present without compromising the ability of future generations to meet their energy needs. Not all renewable energy is sustainable.
