Aquatic and semiaquatic mammals are a diverse group of mammals that dwell partly or entirely in bodies of water. They include the various marine mammals who dwell in oceans, as well as various freshwater species, such as the European otter. They are not a taxon and are not unified by any distinct biological grouping, but rather their dependence on and integral relation to aquatic ecosystems.

Mink are dark-colored, semiaquatic, carnivorous mammals of the genera Neovison and Mustela, and part of the family Mustelidae which also includes weasels, otters and ferrets. There are two extant species referred to as "mink": the American mink and the European mink. The extinct sea mink is related to the American mink, but was much larger. The American mink is larger and more adaptable than the ...

**BEEF HEART:** Although still fed to fish and often part of many homemade fish food recipes due to popular YouTube channels and other social media, Beef Heart is a food source that should be used very sparingly if at all. Although many carnivorous fish enjoy it and it may be a good way to kick start growth in juvenile fish, excessive long term use can add stress to the fish' digestive tract and ...
